

A PROJECT WITH IMPACT

1 of 6 Large Campus Additions

PROJECT DESCRIPTION: The \$15.3 million, 64,000 square-foot Rogalski Center features a trademark rotunda and provides a hub on campus for students, alumni, faculty and staff. The Facility houses services and amenities for students and a ballroom that seats 600 people banquet style. The hall can be subdivided for use by both the university and at-large communities.

IMPACT™ BENEFITS: St. Ambrose is a great supporter of the community and has used the IMPACT agreement on 6 large additions to their campus. "The IMPACT agreement helped us to complete the job with an outstanding level of quality and safety. By signing the IMPACT agreement, we were confident that both labor and management agreed on specific terms before groundbreaking," says Dr. Edward Rogalski, President of St. Ambrose University. Topics of debate such as labor contracts, uniform starting/stopping times as well as holidays were settled. Dr. Rogalski continued, "The absence of these distractions provided for an environment that promoted efficient progress while maintaining high standards and quality craftsmanship. The synergy between Illowa, the contractor and the staff here at St. Ambrose was also beneficial in maintaining high standards and open communication."
